Partnering With You To Deliver an Exceptional Broadband Experience

Partners

Provide the best lived experience

Wifinity brings superfast internet to your site enabling your service personnel to focus on getting the job done, coupled with flexible WiFi to enjoy in their downtime.

Wifinity's Pay As You Go plan is perfect for service personnel. They can choose the contract length that's right for them, whether that's a day, a week, a month—or longer—they only pay for the time they need and can cancel any time.

We also provide DBI as a managed service to the MOD.

Our superfast unfiltered network is available at speeds of up to 1 GB/s delivering the best gaming, streaming, and browsing experience for your troops. With the fastest WiFi in the forces, staying in touch with friends and loved ones has never been so simple.

While at work, they'll also have access to enterprise-grade Defence Business Internet (DBI) specifically designed to meet the needs of the forces.

Wifinity follows stringent security and access management policies as well as all UK government, CESG and MOD best practices, so your team can stay connected with confidence.

Security

We've been providing the MOD with connectivity for many years, and our Pay As You Go and DBI networks are both protected by next-generation firewalls, intrusive detection systems, and virtual private networks.

Flexibility as standard

With our PAYG model, personnel can be online in minutes. No more booking an installation date or sitting around waiting for an engineer. Simply sign up and connect in minutes.

All our packages offer unrestricted access and unlimited data.

Roaming

Once Wifinity WiFi is installed on-site, each user can take their personal and private network on the go. No switching networks as they move from the barracks to the mess or to their workplace, just one home network covering your whole site. And if they roam further afield, they can connect to their private network at any MOD site with Wifinity WiFi—that's over 100 across the UK.

Compliance

Wifinity is certified and authorised in accordance with all relevant mandatory regulations. All projects are scoped, surveyed and designed by SCIDA qualified personnel and all installation works are carried out by fully qualified and highly experienced security-cleared engineers.

Connectivity Designed for You

We carry out a thorough site survey and design a network that works for your needs. This ensures the WiFi signal extends to the furthest reaches of your camp—no dead zones or dropouts, just a seamless connection for everyone.

And once our service is up and running our Network Operations team have eyes on your network 24/7/365 to ensure downtime or service issues are as minimal as possible. Our Customer Support teams are also on hand if users need help 24/7/365.

Helping you to deliver an exceptional connectivity experience

Supporting Your Work

24/7 network support and security operations team

Rapid, scalable deployment

Full managed site-wide connectivity

Secure, managed network

Why Wifinity?

We are experienced connectivity specialists with a proven track record across multiple industries. We pride ourselves on taking the complexity out of connectivity, and we operate high-performance managed networks across our partners' locations. Our broadband is fully supported and easy to use.

Our experience covers social housing, student accommodation, private residential developments and some of the biggest players in the holiday park sector. We can deliver at scale and operate large deployments, as well as offer flexibility for some of our smaller partners.
