

# wifinity

## for Public Sector

Public sector environments need reliable, high-performance connectivity for critical systems and essential service delivery.

Wifinity is a specialist, established managed service provider for local authorities and central government. We deliver managed internet and secure networks, including fully managed SD-WAN and security solutions: Connectivity, managed WiFi, LAN and more, through channel and direct relationships.

A specialist in hard-to-reach venues, we deliver indoor and outdoor networks to environments from city centres to rural areas. Our end-to-end solutions offer secure, adaptable networks, supporting your staff and infrastructure 24/7.

- ✓ Fully Managed Service
- ✓ In-house Network Operations
- ✓ Vendor Agnostic
- ✓ Backhaul Diversity
- ✓ 24/7 Support
- ✓ Scalability as Standard

## Challenges

**Legacy Infrastructure:** Outdated network systems hinder public service delivery & digital transformation.

**Budget Constraints:** Limited investment in new or upgraded connectivity solutions.

**Rural & Remote Areas:** Geographical challenges & costs make high-speed internet access difficult.

**Digital Inclusion:** Bridging the digital divide for essential online services for all citizens.

**Scaling:** Demand for scalable solutions to handle increasing data volumes without performance loss.

**Data Security & Privacy:** Robust cybersecurity to protect against breaches & attacks.

**Estate & Data Management:** Connectivity for smarter estate planning & data-driven decisions.
