

wifinity

for build-to-rent

Transform your residential developments into thriving connected communities with our fully-managed internet service.

Power your BTR community with high performance, scalable internet for smarter living.

Whether a city high-rise or a suburban build-to-rent community, delight residents with a fast and seamless service for modern multi-tenant living.

From day-one broadband to smart building integrations, we provide fully managed, scalable solutions that keep your residents, devices, sensors and services connected, backed by 24/7 UK-based support and robust multi-vendor infrastructure.

Trusted by major property developers and management companies to deliver multi-tenant connectivity for residents, employees, guests and contractors.

Solutions for build-to-rent

Rapid deployment solutions

Provide immediate, managed connectivity for fast-moving BTR construction projects.

Managed WiFi for BTR

Get end-to-end connectivity, real-time dashboard control and insight, and in-built automation.

SD-WAN

Connect and control your entire BTR portfolio from one dashboard. Prioritise WiFi, BMS, and operations for peak performance. And, stay always-on with resilient, secure connectivity.

BTR fibre to the premise

We build, run and manage high-speed FTTP for your BTR sites. You can offer white-labelled fibre internet with revenue share built in, giving residents day-one connectivity, while we manage the entire network for you.

Vendor partners

We offer

- ✓ Fully managed service
- ✓ In-house network operations
- ✓ Vendor agnostic
- ✓ Backhaul diversity
- ✓ 24/7 support
- ✓ Scalability as standard
