

wifinity

for public sector

Transform your public services with reliable high-speed connectivity

Support citizen access, staff productivity, operational efficiency and digital transformation goals with secure high-speed connectivity, smart building technology and fully managed network services.

Wifinity's end to end service connects and supports users, devices and systems across a wide range of public sector environments.

From day one connectivity through to complex multi-site integrations, we deliver scalable fully managed solutions built on robust multi-vendor infrastructure.
